

Course Topic- Certificate In Load Testing (Loadrunner 8.0)

Course Duration	16Hrs
Course Modularity	30% Theory And 70% Practical
Course Pricing	-Rs 5500/- + Service Tax12.24%

Session Plan-

DAY 1

Understanding Load testing

- Understand the terms load, performance, stress testing
- Why load testing?
- What is Loadrunner?

Planning an effective load test

- Study application under test
- Identify test data to be collected

LoadRunner Scripting

- Creating Web Virtual Users (Vusers)
- Recording user actions using Vugen
- Playback action file and review the result
- Understanding Vuser runtime settings

DAT 2

Creating transactions

- Creating transactions while recording and after recording
- Using automatic transactions
- Using transactions to analyze response time

Parameterization

- Creating parameterized script
- Executing parameterized scripts

Verification & Checks

- Image checks
- Text checks
- Scenarios

Defining & Connecting to hosts

- Defining Vusers & Scripts
- Analyzing Reports

Infrastructure Requirement

PC Requirement	P4 or Onwards
Operating System	Windows 2000 or Windows XP
Software's To Be Installed	MS Office, Winrunner, QTP, Loadrunner
Applications To be Installed	Customer Invoicing(Prject4), Hospital Management etc

Stationary Requirement-

- Handouts of Loadrunner
- Notepads
- Pens
- Folders
